Spring? New Year? 6016?

Is the Barley Aviv?

As you may have heard, we have received news from Israel that the crescent was sighted, however, the barley was not found to be aviv. It has always been the policy of Think Red Ink Ministries that when the information regarding the aviv barley is available from Israel we defer to Israel to determine the beginning of the year. That being the case, fruit tree blossoms and daffodils notwithstanding, the year we are presently in (6015) now "officially" contains 13 months.

The New Year (6016) will begin with the crescent in a little over 29 days. If you will allow me liberty, the projected Feast days for 6016 based on this information (*dependent on the crescent sighting) will be as follows:*

Sacred New Year - 04/09/16

Passover - 04/22/16

Feast of Unleavened Bread - 04/23/16

Pentecost - 06/05/16

Day of Trumpets - 10/03/16

Day of Atonement - 10/12/16

Feast of Tabernacles - 10/17/16

Last Great Day - 10/24/16

As difficult as it may be for you to site the new moon and count the days to

the next crescent - I encourage you to keep at it! This is the time of preparation. Don't wait until the lights are out to find my calendar DVD and study the moon phases. Rejoice! The Creator placed the calendar in the sky - for us!
